

Better Than OTC Orthotics

Right now you might be wondering, "Can't I just go to the store and buy the cheaper orthotics?"

Yes, you can go to the store and buy the cheaper orthotics—along with the glasses that aren't your prescription, or the over-the-counter medicine that only masks your symptoms.

But, here's why you shouldn't:

Customized Orthotics vs Insoles

Over the counter "orthotic" insoles are cheap but the cost to you can be very high. It's important to understand the differences. Foot Levelers customized orthotics provide the highest-quality, most comfortable, and most effective orthotic on the market.

Why Custom-Made Orthotics?

FootLevelers.com

Why Custom Orthotics?

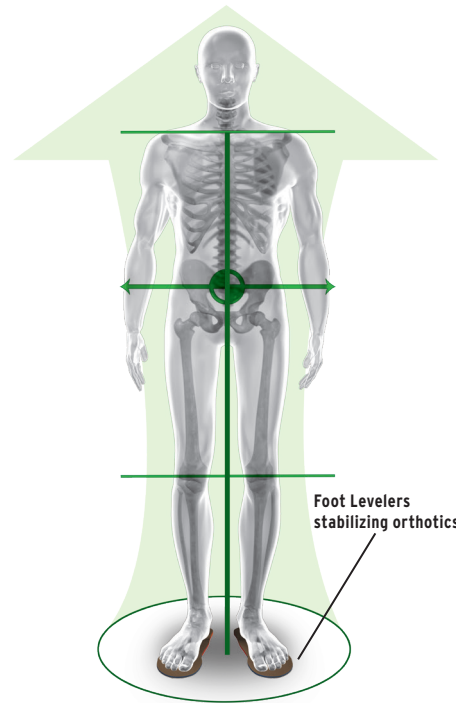

Foot Levelers custom-made orthotics are made for you. We don't have templates. We aren't one-size fits all. You're not just a number to us.

Our orthotics, or Stabilizing Orthotics as we call them, are **handcrafted in the USA by skilled technicians with decades of experience.**

Generic, over-the-counter insoles are mass produced, don't address the underlying cause of pain and discomfort, and are made of inferior materials.

Benefits of Custom Orthotics

- Our patented design helps you feel your best all day long
- Stabilizing Orthotics are PROVEN to reduce Low Back Pain by 34.5%.*
- Innovative materials help reduce pain when your heel hits the ground
- 1-year, 100% money-back guarantee

There are actually **three arches** in your foot: (see image to the right).

Over-the-counter insoles support only 1 arch, which can make symptoms worse.

Foot Levelers' patented design supports all 3 arches, offering proper support to help reduce pain and improve performance.

The Doctor's Expertise

As good as our Stabilizing Orthotics are, and as good as our scanning methods are, **we still need the doctor's input.**

As a biomechanical expert, the **doctor is able to provide us with details** about your activities and health that play a **vital role in crafting your Stabilizing Orthotics.**
